Deferred tax liability or assets is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only to the extent that there is virtual certainty that sufficient taxable income will be available to realise these assets. All other deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient taxable income will be available to realise these assets.
